Company overview
The a2 Milk Company™ at a glance

- The a2 Milk Company (“a2MC”) is in the business of producing, marketing and selling premium branded dairy and infant formula products in targeted global markets.

- a2MC branded products contain only A2 beta-casein protein rather than both A1 protein and A2 protein which are found in regular cows’ milk products.

- How is a2MC unique from other dairy businesses?
  1 Focused on building a high margin and differentiated business supported by an integrated IP portfolio.
  2 Seek to achieve upper quartile return on capital through investment in brand building and a flexible and scalable supply chain.
  3 Distinctive products that have broad appeal across a number of developed and emerging markets.

3 Guidance released to market on 17th February 2016
Distinctive and premium product portfolio is expanding
What is the a2 Milk™ difference?

- The a2 Milk® brand is a naturally occurring cows’ milk and not a product of a technological process or genetic engineering

 Originally all cows produced milk containing only A2 protein type

Genetic variation occurred in European herds via modern farming practices

~70%

A1/A1 protein

~30%

A1/A2 protein

A2/A2 protein

All regular milk mix of A1 and A2 proteins

The only milk that naturally contains only the A2 protein and free from A1 protein
Investment highlights

a2MC is not a conventional dairy company

01 Premium brand and product range supported by an integrated intellectual property portfolio and growing scientific evidence

02 Proven and profitable Australian business remains on a strong growth trajectory

03 Outstanding success of a2 Platinum® infant formula (China, Australia) provides long term growth potential and is significant contributor to earnings

04 Strategic investments in USA and UK provide exciting platform for future growth

05 Flexible and scalable supply chain allows optimization of return on capital

06 Senior management team with relevant industry and market experience, focused on creating value for shareholders
Focussed and consistent strategic growth map

**STRATEGIC INTENT**
- Continue to build a substantial premium dairy business in Australia and NZ
- Establish and build a global infant formula business
- Capture sustainable shares for premium a2MC branded products in targeted global dairy markets

**STRATEGIC PRIORITIES**
1. Australian growth in liquid milk and other dairy products
2. Investigate NZ liquid milk opportunity

1. Capitalise on the Australian business’ position and build upon current launch momentum of a2 Platinum®
2. Strengthen the a2 Platinum® brand presence in China amongst targeted consumer group
3. Seek additional market opportunities

1. Continue to build on USA milk market entry
2. Continue to build UK business
3. Actively pursue China liquid milk opportunity utilising Australian exports
4. Explore other priority Asian markets

¹ Non-recurring items represent ASX listing costs of $1.7 million in FY15

- Gross margin increase reflects ongoing growth in Australian fresh milk business and significant acceleration of infant formula. Trend has continued strongly into FY16
- Other expenses increased primarily due to expansion into new markets
- FY15 EBITDA includes investment establishing positions in the US of NZ$4.3 million and the UK of NZ$7.8 million
- FY16 full year forecast increased to Group revenue range of $335 million to $350 million and Group operating EBITDA range of $45 million to $49 million

- FY15 was a record year for the ANZ business with growth expected to build into FY16
  - a2 Platinum® sales building with significantly increased demand and liquid milk sales continuing to grow
- Following investment in previous years China and Other Asia experiencing strong a2 Platinum® revenue and profit growth in FY16
- Rest of world roll-out underway in the US and the UK
  - The initial US entry commenced in Southern California from April 2015, followed by expansion into Northern California
  - UK on track to achieve monthly breakeven by year end, ahead of plan
- Corporate and Other comprises group costs including board/senior management, IP and R&D cost

---

1 Before non-recurring items relating to the ASX listing: FY15 $1.7million; 1H15 of $0.8million
Regional overview
Australia and New Zealand business overview

**Current position**

- Significant branded milk business with a reliable supply chain, continued sales growth and premium pricing
- Australian business achieved 45% 5-year CAGR to December 2015
- Segment revenue grew by 76% on pcp to NZ$127.9 million for 6 months to December 2015
- Modern purpose-built processing facility in Sydney, quality 3rd party processors and developed distribution network
- a2 Milk™ brand is largest premium milk brand at ~9.3% market share¹
- a2 Platinum® was the fastest growing infant formula brand with a grocery market share by value of ~16.7% across supermarkets and pharmacy²
- a2 Ice Cream™ distribution now broadened to all major Australian retailers
- Expanding into a2 Milk™ branded whole milk powder given the strong growth opportunity

**Growth strategy**

- Continue to enhance premium brand strength
- Build on core ANZ liquid milk business
- Continue to grow a2 Platinum® and other dairy product innovation
- Build scale and efficiency

China and Other Asia business overview

**Current position**

- Launched a2 Platinum® in Nov 2013 with the intention of establishing a position in China before expanding into other Asian markets
- a2MC now directly manages sales and distribution with a growing team based in Shanghai and Auckland
- The business is performing well ahead of plan in FY16 and is posting positive EBITDA returns
- Multi-product, multi-channel strategy to build both local China products and cross-border ANZ labelled products
- Strong emphasis on e-commerce retailers and Mother & Baby channels where distribution is over 1,000 stores
- E-commerce partners include T-mall, JD.com and other strategic digital platforms
- Infant formula processed and packaged by Synlait Milk NZ which has an integrated facility and allows full manufacturing and packaging control

**Growth strategy**

- Build a high profile premium brand in China
- Educate consumers and health professionals about the unique benefits of the A2 protein
- Build core infant formula and milk (liquid and powder) businesses
- Build relationships with distributors, e-commerce partners, retailers. Continue to utilize and maximize e-commerce presence
UK business overview

**Current position**

- Commenced sales in the UK in Nov 2012 through a JV with Robert Wiseman Dairies which was then subject to a takeover by the Müller group
- In Jan 2014 a2MC fully acquired UK JV
- a2 Milk™ brand repositioned during calendar 2014 to premium specialty milk segment
- a2 Milk™ fresh milk unit sales continue to grow from modest base, distributed in 4 of the 5 key UK grocery retailers
- Marketing focused on digital advertising, promotional events and health care professional engagement
- Revised UK business model broadens the product portfolio beyond fresh milk with UHT milk available from Q2 and a market trial for a2 Platinum® underway
- The UK business on track to achieve monthly breakeven ahead of plan, by end of FY16

**Growth strategy**

- Continue to build targeted premium brand
- Grow distribution in existing supermarkets (in-store and online)
- Expand product portfolio (UHT and infant formula) as milk business develops
USA business overview

Current position

• Initial launch commenced in Southern California region from April 2015, extended to Northern California
• a2MC pleased with progress in building distribution in Southern and Northern California, with future plan to extend to additional state markets
• Quality partner contracted to manage milk supply and processing
• Estimated retail weighted distribution in California of circa 85% from February following acceptance across Safeway/Alberstons/Vons stores
• Units per store per week building, on track to achieve target rates of 30¹ by end FY16 in key retailers
• TV advertising campaign launched in February in Los Angeles coupled with social digital media, PR, shopper marketing and in-store promotional activity across total California (www.a2milk.com)
• Given build in retail distribution, plan to invest additional US$3 million during 2H16
• Building strong credibility with HCP network, gaining support with science and medical practitioners, including USA clinical trial initiative

¹ Refers to units per store per week for the total range
USA grocery milk category overview

- US$10.2 billion grocery milk category down ~5.5% over the 52 weeks ending 1 November 2015
- Regular white milk sales driving overall decline (~9.2% category decline)
- Main driver of decline in regular milk is digestive related
- Strong growth in specialty milk and milk substitutes (plant-based) gaining share from regular white milk
- a2MC product format in ½ gallon carton across four variants in specialty milk category

Infant formula
a2 Platinum® overview

Current position

- Infant formula accounts for ~53% of total group revenue
- Compelling and unique point of difference
  - The only infant formula naturally rich in the A2 beta casein protein which supports a baby’s natural digestion
  - Taps into significant growth of alternative milk formula products due to its natural digestive health benefits
  - Remainder of formulation is on par with premium market leaders (Omega 3 DHA, prebiotics and essential nutrients such as iron, calcium, vitamin D, zinc and iodine)
- Demand continues to grow amongst Australian and Chinese mothers
  - The growing success of a2 Platinum® is based on the well established quality reputation of the a2 Milk™ brand in Australia
- Experiencing stock shortages in first half despite increased production
- Building further milk supply in NZ to increase production in FY17
- Majority of sales occurred across Australian grocery and pharmacy channels, however direct sales into China increasing in cross border e-commerce channels and mother baby retail stores

Infant formula supply chain

Milk sourced from growing number of farmers in NZ
Infant formula manufactured by Synlait Milk on behalf of a2MC in NZ
Imported into China by China State Farm or Australia directly by a2MC
Distributed in China by a2MC via 3rd party arrangements or managed directly by a2MC in ANZ
ANZ sales focus on supermarkets and pharmacy channel.
China focus on e-commerce platforms and “mother and baby” stores
China regulatory issues under review

- Presently a number of regulatory changes signalled for review by the Chinese Government
- A number of changes remain in draft form
- a2MC continues to monitor developments in this area, positioned to respond to change

R&D update
R&D Update

• Continuing to develop and enhance portfolio of brand assets, intellectual property and participate in R&D associated with the benefits of the A2 beta-casein protein and the absence of A1

• Research findings from recent completed studies:
  – Explains at the human cell level the mode of action and digestive benefits of a2 Milk™
  – The consumption of a2 Milk™ products can increase antioxidant production (glutathione) over and above regular dairy
  – BCM-7 from A1 protein has a negative effect on human neural stem cell growth and development

• Several new research studies have been initiated
  – Further clinical trials in China to assess benefits of A2 beta casein protein amongst adults, preschoolers and infants
  – A clinical trial into the benefits of a2 Milk® to digestive function with a leading USA biomedical research center
  – Professor Gibson in conjunction with Monash University Australia will lead a human clinical study examining the benefits of a2 Milk™ on IBS/bowel inflammation

• New Zealand government awarded the Company a significant NZ$1.1 million research grant in partnership with AgResearch and The University of Auckland as part of a government push to invest funds into areas of High-Value Nutrition (www.highvaluenutrition.co.nz)
New human clinical research under publication

- As previously reported a human clinical trial was conducted in China and submitted for publication during H1 FY16
- China was chosen due to the significant levels of reported lactose intolerance
- The results lend further support around the digestive benefits of milk free of the A1 protein and has been accepted for publication by a respected European Journal in April 2016
- Findings enhance the commercial opportunity for a2MC within China and other markets with high levels of milk intolerance
New global health care educational materials

Summary
Summary

✓ A proven, sustainable, profitable business model in ANZ delivering upper quartile returns on capital relative to the industry

✓ Establishing a premium infant formula brand and business synonymous with quality - targeting growth across multiple markets

✓ Business centered on continuing to build a unique premium international brand that is supported by a multi-product, multi-channel strategy

✓ Broad and consistent positive consumer acceptance of the benefits of A2 protein and continuing to pioneer further knowledge and understanding

✓ First mover advantage given comprehensive intellectual property portfolio, brand equity and a2MC business systems and experience
a2MC receiving strong global media attention

The milk you’ve never heard of that’s rocking the dairy world
Millions of Australians are ditching organic milk in favour of the best selling premium milk: a2 Milk

New milk featuring an old protein promises big health benefits
Dairy products containing only one of two milk proteins might be easier to digest than conventional milk

The milk that might change everything?
a2 Milk – milk from cows that only produce A2 beta-casein protein – is set for an April launch in California

You’re drinking the wrong kind of milk
An emerging body of research suggests that many of the 1 in 4 Americans who exhibit symptoms of lactose intolerance could instead be unable to digest A1 protein

a2 Milk less likely to cause gastro problems: new study
First human trial measures the impact of A1 and A2 protein on the digestive system. A1 tougher on the gut according to double-blind test at Curtin University

Should we be giving up cows’ milk?
If you think milk protein is the issue, you could try a2 Milk, a dairy revolution which started in Australia
